Refer to "Sub-Fund Descriptions – Income Fund" of the Prospectus for further information on the investment strategy of the Sub-Fund.

## Parties Involved

### WHO ARE YOU INVESTING WITH?

JPMorgan Funds is the umbrella fund company of the Sub-Fund.

The Management Company is JPMorgan Asset Management (Europe) S.à r.l..

The joint Investment Manager is J.P. Morgan Investment Management Inc..

The Depositary is J.P. Morgan SE – Luxembourg Branch.

Refer to "Fund Business Operations" of the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.

## KEY RISKS

### WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The Sub-Fund may have a higher volatility to its NAV due to its investment policy when compared to sub-funds investing in global markets, with broader investment policies and/or are a less volatile asset class.

Refer to "Risk Descriptions" and "Sub-Fund Descriptions – Income Fund" of the Prospectus for further information on risks and other associated risks of the product.

## Market and Credit Risks

### YOU ARE EXPOSED TO MARKET AND CREDIT RISKS

**Concentration** – When a Sub-Fund invests in a limited number of securities, issuers, industries, sectors or within a limited geographical area, it is likely to be more volatile and risky as its performance will be more strongly affected by political, economic, environmental or market conditions within that area or economic sector.

**Contingent convertible bonds** are likely to be adversely impacted should specific trigger events occur. This may result in the bond converting to equity at a discount, the value being written down and/or coupon payments ceasing or being deferred.

**Convertible securities** have characteristics of both debt and equity securities and carry credit, default, equity, interest rate, liquidity and market risks. Convertible securities are usually subordinated to comparable nonconvertible securities and generally do not participate directly in dividend changes of the underlying securities.

**Debt securities** (bonds) including those issued or guaranteed by governments and their agencies carry credit risk and interest rate risk. The Sub-Fund is also exposed to risks associated with investing in Government debt, Investment grade debt, Below Investment grade debt and Unrated debt.

**Equities** – The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions sometimes rapidly or unpredictably.

**Emerging markets** may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency, greater financial risks, higher volatility and lower liquidity than developed markets.

**MBS and ABS** depend on the cash flows from a specified pool of financial assets and are subject to greater credit, liquidity, pre-payment and interest rate risk and may be more volatile and less liquid than other bonds.

**REITs** are subject to the risks associated with the ownership of real estate which may expose the Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.

**Credit** – A bond will generally lose value if the issuer’s financial health deteriorates, or appears likely to. An issuer could go into default (become unwilling or unable to make payments on their bonds), which often will make the bond illiquid or worthless.

**YOU ARE EXPOSED TO CURRENCY RISKS**

**Currency** – Movements in currency exchange rates can adversely affect the return of your investment. Investing in a share class not denominated in SGD will expose you to additional currency risks.

**Hedging** – Any measures taken to offset specific risks could work imperfectly. Hedging may be used to mitigate currency, duration, market or credit risk. Hedging involves costs, which reduce investment performance.

**Liquidity Risks**

The Sub-Fund is not listed and you can redeem only on a Singapore Dealing Day.

If the total requests for redemptions and switches out of the Sub-Fund on any Valuation Day exceeds 10% of the total value of Shares in issue of the Sub-Fund, the Management Company reserves the right to defer any requests in excess of 10% until the next Valuation Day. On the next Valuation Day(s), deferred requests will be dealt with in priority to later requests.

**Product Specific Risks**

**YOU ARE EXPOSED TO DERIVATIVES RISKS**

The Sub-Fund may, within its prescribed limits, invest in derivatives for hedging and Efficient Portfolio Management purposes.

The value of derivatives can be volatile because a small movement in the value of the underlying asset can cause a large movement in the value of the derivative, resulting in losses in excess of the amount invested by the Sub-Fund.

**YOU ARE EXPOSED TO SECURITIES LENDING RISK**

The use of securities lending exposes the Sub-Fund to counterparty risk and liquidity risk.

**Short positions** – The possible losses from taking a short position on a security may be unlimited as there is no restriction on the price to which a security may rise. Short positions may increase the volatility of the Sub-Fund and this technique could be prejudiced by regulatory change.
