KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- ▶ The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 6 "Risks" of the Singapore Prospectus and sections 1.4 "General Risk Considerations" and 3.3 "Sub-fund specific risk considerations" of the Luxembourg Prospectus for further information on risks of the product.

MARKET AND CREDIT RISKS

- ▶ You are exposed to Interest Rate Risk
Bonds and other fixed income securities are more susceptible to fluctuation in interest rates and may fall in value if interest rates change.
- ▶ You are exposed to Credit Risk
A bond or money market security could lose value if the issuer's financial health deteriorates.
- ▶ You are exposed to Market Risk
The value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies in emerging markets.
- ▶ You are exposed to Foreign Exchange Risk
Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.

LIQUIDITY RISKS

- ▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- ▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

PRODUCT-SPECIFIC RISKS

- ▶ You are exposed to Emerging Markets Risk
Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity, market volatility (such as interest rate and price volatility) and regulatory risks.
- ▶ You are exposed to Chinese Markets Risk
Investing in emerging markets such as the PRC subjects the Sub-Fund to a higher level of market risk than investments in a developed country.
- ▶ You are exposed to China Interbank Bond Market (CIBM)
Investments in the CIBM are subject to these risks: market and liquidity risks, Chinese local credit rating risks, counterparty and settlement risk, operational risk, quasi-Government/ local Government bond risk, urban investment bonds risk and regulatory risk.
- ▶ You are exposed to Asset-Backed Securities (ABS) & Mortgage-Backed Securities (MBS) Risk
Investment in ABS and MBS entails additional risks pertaining to the underlying pool of assets (e.g. receivables) such as credit risk, interest rate risk, prepayment risk, counterparty risk and liquidity risk.
- ▶ You are exposed to Non-Investment Grade Debt / Unrated Debt Risk
Credit risk may be greater for Non-Investment Grade investments as they may be subject to a higher risk of default and greater price volatility.
