- ▶ Are comfortable with investing in smaller capitalisation securities, which may restrict liquidity and increase the volatility of returns

Refer to paragraph 3.1 “Investment Objectives, Focus and Approach” of the Singapore Prospectus and section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- ▶ You are investing in a Sub-Fund of the HSBC Global Investment Funds (the “Fund”), an investment company (*Société d’Investissement à Capital Variable*) incorporated in the Grand Duchy of Luxembourg and qualifying as an Undertaking for Collective Investment in Transferable Securities (UCITS) complying with the provisions of Part I of the 2010 Law. The Fund is structured as an umbrella fund offering Shares in the Sub-Fund for investment.
- ▶ Investment Objective
The Sub-Fund seeks long-term total return by investing (normally a minimum of 90% of its net assets) in a portfolio of equity and equity equivalent securities of smaller and mid-sized companies which are based in any Eurozone member country, while promoting ESG characteristics within the meaning of Article 8 of SFDR.
- ▶ For Distribution Share Classes of a Sub-Fund (if made available for subscription), distributions out of capital (if any) will reduce the Net Asset Value of the relevant Share Class of the Sub-Fund.

Refer to paragraphs 1 and 3.1 “Investment Objectives, Focus and Approach” of the Singapore Prospectus and section 3.2 “Sub-Funds details” of the Luxembourg Prospectus for further information on features of the product.

¹ The Singapore Prospectus is accessible at <http://www.assetmanagement.hsbc.com/sg>.

² The expense ratios for Share Classes offered less than 1 year are computed on an annualised basis.

INVESTMENT STRATEGY

Smaller and mid-sized companies are those companies whose market capitalisation generally comprises the lowest tier of the aggregate Eurozone market, defined as companies whose market capitalisation is below EUR 10 billion as well as companies within the MSCI EMU SMID.

The Sub-Fund includes the identification and analysis of a company's ESG credentials ("ESG Credentials") as an integral part of the investment decision making process to reduce risk and enhance returns.

ESG Credentials may include, but are not limited to:

- environmental and social factors, including but not limited to physical risks of climate change and human capital management, that may have a material impact on a security issuer's financial performance and valuation.
- corporate governance practices that protect minority investor interests and promote long term sustainable value creation.

The Sub-Fund will not invest in equities issued by companies with specified involvement in specific excluded activities ("Excluded Activities"). Excluded Activities and specified involvement are proprietary to HSBC.

The Sub-Fund conducts enhanced due diligence on companies that are considered to be non-compliant with the UN Global Compact Principles, or are considered to be high risk as determined by the HSBC's proprietary ESG ratings.

ESG Credentials, Excluded Activities and the need for enhanced due diligence may be identified and analysed by using, but not exclusively, HSBC's proprietary ESG Materiality Framework and ratings, fundamental qualitative research and corporate engagement. The Investment Adviser may rely on expertise, research and information provided by financial and non-financial data providers. More information on HSBC Asset Management's responsible investing policies is available at www.assetmanagement.hsbc.com/about-us/responsible-investing/policies.

The Sub-Fund may use financial derivative instruments for hedging and cash flow management (for example, Equitisation). However, the Sub-Fund will not use financial derivative instruments extensively for investment purposes. Financial derivative instruments may also be used for efficient portfolio management purposes.

The Sub-Fund can enter into Securities Lending transactions for up to 29% of its net assets, however, it is expected that this will not exceed 25%.

The Sub-Fund is actively managed and does not track a benchmark. The reference benchmark for Sub-Fund market comparison purposes is MSCI EMU SMID.

Refer to section 3.2 "Sub-Funds details" of the Luxembourg Prospectus for details on the structure of the Sub-Fund.

- ▶ Investment Adviser - HSBC Global Asset Management (France)
- ▶ Custodian / Depository Bank - HSBC Continental Europe, Luxembourg

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- ▶ The value of the Sub-Fund's assets may rise or fall due to normal market fluctuations and investors may not get back all of their investment.

Refer to paragraph 6 "Risks" of the Singapore Prospectus and sections 1.4 "General Risk Considerations" and 3.3 "Sub-fund specific risk considerations" of the Luxembourg Prospectus for further information on risks of the product.

MARKET AND CREDIT RISKS

- ▶ You are exposed to Market Risk
The value of investments may be affected by uncertainties such as international, political and economic developments or changes in government policies in the European Monetary Union.
- ▶ You are exposed to Foreign Exchange Risk
The underlying assets of the Sub-Fund may be denominated in currencies other than the currency of the share class you have invested into. The value of your investment may rise or fall in line with movements in the relevant exchange rates.

LIQUIDITY RISKS

- ▶ The Sub-Fund is not listed in Singapore and there is no secondary market for its Shares. You can only redeem your investment on a Dealing Day through the Sub-Fund.
- ▶ Investment of the Sub-Fund's assets in relatively illiquid investments may restrict the ability of the Sub-Fund to dispose of its investments at a price and time that it wishes to do so. This may result in a loss to the Sub-Fund.

PRODUCT-SPECIFIC RISKS

- ▶ You are exposed to Small Cap Risk
The Sub-Fund's investments include smaller capitalisation companies that may involve more risk than larger, more established companies due to factors such as greater volatility, higher transaction costs and lesser liquidity.
- ▶ You are exposed to Derivative Risk
Financial derivative instruments may be leveraged and their prices can be very volatile. Investment in these instruments may result in losses in excess of the original amount invested. If the issuers of the derivative instruments default, or such securities or their underlying assets cannot be realized, or perform badly, investors may suffer substantial or, in certain cases, total loss of their investments. Governmental regulation and supervision of transactions on the OTC markets is generally lesser than of transactions on organised exchanges. Thus, investing in OTC derivatives involves higher counterparty risk and liquidity risk.
