KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in an open-ended collective investment scheme (referred to as an “undertaking for collective investment in transferable securities” or UCITS) constituted in Luxembourg that aims to maximise, consistent with prudent investment management, total investment return, consisting of a combination of profit income and capital appreciation.
- Subject to any legal or regulatory requirements, distributions may also be made out of the capital of the Fund. Should distributions be paid, the net asset value (“NAV”) of the Fund will be reduced by the amount of distribution paid.

Refer to the “Investment Objective, Focus and Approach of the Funds” section of the Singapore Prospectus, and the “Dividend Policy” section of the Luxembourg Prospectus for further information on features of the product.

Investment Strategy

- The Fund will generally invest at least two-thirds of its total assets (without taking into account ancillary liquid assets) in fixed- and floating-rate Shariah-compliant securities (including non-investment grade securities), issued by government, government-related and corporate entities located in developed and developing countries.
- The Fund may, in accordance with its investment policy and the Shariah guidelines, invest in securities or financial derivative instruments for hedging, efficient portfolio management and/or investment purposes.
- Other investments may include Sukuk instruments and short term instruments (including Murabaha placements and Sharia compliant credit linked notes or structured products).
- The expected level of exposure that could be subject to total return swaps (unfunded) amounts to 5% of the Fund’s net assets, subject to a maximum of 20%.

<p>instruments, the Fund may find itself exposed to risks arising from the solvency of its counterparties, their ability to respect the conditions of these contracts, the possible limited number of approved counterparties and/or where they do not offer competitive rates for hedging or decide not to roll a hedging transaction when due.</p> <p>You are exposed to Shariah compliance risk.</p> <ul style="list-style-type: none"> The restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs funds without this restriction.
