Investment Strategy

- The Fund invests at least 70% of its total assets in the fixed income transferable securities denominated in various currencies issued by governments, government agencies, companies and supranationals worldwide, including in emerging markets. In order to maximise average income, the Fund will seek diversified income sources across a variety of such fixed income transferable securities. Currency exposure is flexibly managed.
- The Fund’s total assets will be invested in accordance with the ESG Policy, as outlined below and further described in the Singapore Prospectus: The Fund will apply the BlackRock EMEA Baseline Screens. The Investment Adviser intends to invest in “green bonds” (as further described in the Singapore Prospectus) and limit direct investment in securities of issuers involved in the ownership or operation of gambling related activities or facilities; production, supply and mining activities related to nuclear power and production of adult entertainment materials. The Fund may gain limited indirect exposure (through e.g. derivatives) to issuers that do not meet the ESG criteria described above.
- The Fund may gain direct exposure for no more than 20% of its total assets to onshore bonds distributed in Mainland China in the China Interbank Bond Market via the Foreign Access Regime and/or Bond Connect and/or other means as may be permitted by the relevant regulations from time to time.
- The Fund may invest more than 10% (but not more than 20%) of its Net Asset Value in debt securities issued by and/or guaranteed by governments in each of Brazil, Hungary, Indonesia, Russia, Republic of South Africa, and Turkey, countries which are, at the date of the Prospectus, rated non-investment grade. The aforementioned countries are for reference only and may change without prior notice.
- As part of its investment objective the Fund may invest up to 60% of its total assets in asset-backed securities (“ABS”) and mortgage-backed securities (“MBS”) whether investment grade or not. These may include, without limitation, asset-backed commercial paper, collateralised debt obligations and collateralised mortgage obligations. The ABS and MBS in which the Fund invests may use leverage to increase return to investors.
- The Fund’s exposure to distressed securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.
- The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.
