KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of Neuberger Berman Investment Funds plc, which is an investment company incorporated under the laws of Ireland and authorised as a UCITS umbrella fund by the Central Bank of Ireland. The Portfolio aims to achieve a target average return of 1-1.5%% over its benchmark before fees over a market cycle (typically 3 years) by primarily investing in Hard Currency-denominated debt issued in Asian countries.
- Dividend policy:
 - Accumulating shares: No dividends will be paid.
 - Distributing shares: Dividends in respect of (Monthly) Distributing Classes shall be declared on or prior to the last Business Day of each month (and paid within three Business Days thereafter) at the discretion of the Directors.

Refer to "THE COMPANY", "THE PORTFOLIOS" and "INVESTMENT OBJECTIVE, FOCUS AND APPROACH" of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- The Portfolio will invest primarily in debt securities and money market instruments which are issued by governments of, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in Hard Currency.
- With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on Recognised Markets globally, without any particular focus on any one

<p>industrial sector.</p> <ul style="list-style-type: none"> • Under normal market conditions, the Manager and the Sub-Investment Managers will invest at least two thirds of the Portfolio's NAV in Hard Currency debt securities and money market instruments issued by public or private issuers in Asian countries. Public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned. • A maximum of 60% of the Portfolio's NAV may be invested in debt securities and money market instruments which are issued by non-corporate issuers and denominated in Hard Currency. • A maximum of 35% of the Portfolio's NAV may be invested in debt securities and money market instruments which are issued by quasi-sovereign issuers (100% state owned or explicit sovereign guarantee). • A maximum of 10% of the Portfolio's NAV may be invested in debt securities and money market instruments which are issued by sub-sovereign issuers (state, regional, municipal debt). • The Manager and Sub-Investment Managers implement a systematic and disciplined framework for analysing sovereign and corporate local currency and Hard Currency debt securities. • The maximum proportion of the Portfolio's NAV that can be subject to total return swaps is 10%. The expected proportion of the Portfolio's NAV that will be subject to total return swaps is 1%. • Repo Contracts and Securities Lending Agreements may be used subject to the conditions and limits set out in the Prospectus. The Portfolio will not utilise margin lending. • The Portfolio may use FDIs for investment purposes, efficient portfolio management purposes and/or hedging purposes. • The Portfolio may or may be expected to have medium to high levels of volatility due to its investment policies or portfolio management techniques. 	<p>further information on the investment strategy.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • You are investing in Neuberger Berman Investment Funds plc, an umbrella fund of which the Portfolio is a sub-fund. • The manager is Neuberger Berman Asset Management Ireland Limited and the sub-investment managers are Neuberger Berman Investment Advisers LLC, Neuberger Berman Singapore Pte. Limited and Neuberger Berman Europe Limited. • The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited. 	<p>Refer to "THE COMPANY", "MANAGEMENT", "OTHER PARTIES" and "INSOLVENCY OF THE PARTIES" of the Singapore Prospectus for further information on the role and responsibilities of these entities and what happens when they become insolvent.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:</p>	<p>Refer to "RISK FACTORS" of the Singapore Prospectus for further information on the risk of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • Fixed Income Securities and Downgrade Risk – Fixed income securities are subject to credit risk and price volatility. Fixed income securities are also exposed to the risk of being downgraded, which can cause a significant drop in the value of the Portfolio. The Manager or Sub-Investment Managers may or may not be able to dispose of the debt instruments that are being downgraded. • Lower Rated Securities Risk – The Portfolio may invest in lower rated or unrated (i.e. non-investment grade or high yield) securities, which are more likely to react to developments affecting market and credit risk than are more highly rated securities. The Portfolio may therefore find it more difficult to sell such high yield securities or may be able 	

<p>to sell these securities only at prices lower than if such securities were widely traded. The Portfolio may experience difficulty in valuing certain securities at certain times.</p> <ul style="list-style-type: none"> • Credit and sovereign debt risk – The Portfolio may invest in corporate and government/sovereign fixed income securities. Corporate issuers of fixed income securities may fail to meet their interest repayments, or repay debt. Investment in sovereign debts issued or guaranteed by governments may involve a high degree of risk, as default can occur if the government or sovereign entity is not able or willing to repay the principal and/or interest when due. • Emerging Market Economies Risk and Emerging Market Debt Securities Risk – Investing in emerging markets may involve heightened risks (some of which could be significant) such as social, economic and political uncertainty, and periods of extreme volatility. Debt securities of Emerging Market Countries may be subject to greater risk of loss of principal and interest and liquidity risk, and be exposed to fluctuations in yields or prices, than debt securities issued by obligors in developed countries. • PRC Debt Securities Market Risk – The Portfolio may be exposed to risks associated with the PRC debt securities market including settlement risk, liquidity risk, credit risk, credit ratings risk and risk of higher price volatility, amongst others. • Risks Associated with Investment in the China Interbank Bond Market through Bond Connect - investing through Bond Connect in eligible bonds traded on the China Interbank Bond Market may expose to other risks including but not limited to suspension risk, operational risk, differences in trading day, regulatory risk and taxation risk, which may adversely affect the portfolio's ability to access PRC bond market to achieve his investment objectives. • Taxation in the PRC Risk – Investment in PRC Onshore Bonds – The Portfolio may invest in PRC bonds via the QFI regime. Tax regulations in the PRC are subject to change which could have a significant adverse effect on the Portfolio and its investments. • Currency Risk – The base currency value of the investment of the Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. The currency exchange rates of Emerging Market Countries tend to be more volatile than those of more developed countries. As the base currency of the Portfolio is not in Singapore dollars, Singapore investors may be exposed to an additional currency risk. • Currency Hedging Risk – Currency hedging instruments may involve the risk of a default by a counterparty. • PRC/QFI Risks – The Portfolio's exposure to the China bond market may be obtained via the QFI regime. Risks associated with the QFI regime include regulatory risks, quota risks, repatriation risks, custody risks and currency risks. 	
Liquidity Risks	
<ul style="list-style-type: none"> • The Portfolio is not listed in Singapore and you can redeem only on Dealing Days – There is no secondary market for the Portfolio. Your right to redeem may be suspended or deferred under certain circumstances. 	
Product-Specific Risks	
<ul style="list-style-type: none"> • Risks relating to the use of FDI – FDIs may be subject to various types of risks, including market risk, liquidity risk, counterparty credit risk, legal risk and operations risk. In addition, FDIs can involve significant economic leverage and may, in some cases, involve high risk of significant loss. The use of FDIs may lead to risk of loss of capital or increase the volatility of a Portfolio's NAV. • High Leverage Risk – The Portfolio may have a net leveraged exposure of over 100% of its NAV as a result of its use of FDI which may result in a significant or a total loss of the Portfolio. • Risks relating to dividend payment – Dividends paid out of capital amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment which may result in an immediate decrease in the NAV of the relevant shares. An investment in high yield securities does not necessarily imply high dividend distribution for all share classes.

VALUATIONS AND EXITING FROM THIS INVESTMENT																				
<p>HOW OFTEN ARE VALUATIONS AVAILABLE? The NAV per share in respect of each Dealing Day is normally available on www.nb.com on the following Business Day.</p> <p>HOW CAN YOU EXIT FROM THIS INVESTMENT AND WHAT ARE THE RISKS AND COST IN DOING SO?</p> <ul style="list-style-type: none"> The Company does not offer a right to cancel subscriptions into the Portfolio, but you should check if your Singapore distributor will allow you to do so. You can exit the Portfolio by submitting your redemption form to the Singapore distributor from whom you had originally purchased your shares. Shares may be redeemed on any Dealing Day. Redemption proceeds will normally be made to Singapore distributors within 10 Business Days and you should check with your Singapore distributor when you can expect to receive your redemption proceeds. The redemption price of your shares is determined as follows: <ul style="list-style-type: none"> If your redemption form is received by the Administrator before 3 p.m. (Irish time) on a Business Day before a Dealing Day, your Shares will normally be redeemed at their NAV as of that Dealing Day. If your redemption form is received by the Administrator after such deadline, your Shares will normally be redeemed at their NAV as of the next Dealing Day. <p>(Please confirm with your Singapore distributor the applicable Singapore cut-off time for receiving your redemption form in order for your Shares to be redeemed at their NAV as of a particular Dealing Day)</p> The redemption proceeds that you will receive will be the redemption price per share multiplied by the number of shares redeemed, less any charges.
