

Aberdeen Standard SICAV I - Diversified Income Fund

A MInc USD

Performance data and analytics to 30 April 2023

Objective

The Fund aims to achieve a combination of income and some growth by actively managing allocations in investments in a broad range of global assets. The Fund aims to exceed the return on cash deposits (as currently measured by a benchmark of US Secured Overnight Financing Rate ("SOFR")) by 5% per annum over rolling five year periods (before charges). There is however no certainty or promise that the Fund will achieve this level of return.

Portfolio securities

- The Fund is a global fund insofar as its investments are not confined to or concentrated in any particular geographic region or market.
- The Fund's investments include, but are not limited to, shares of companies, bonds (which are loans that can pay a fixed or variable interest rate) issued by Governments, banks and international companies.
- The Fund may also invest in other Funds (including those managed by abrdn), money-market instruments, and cash.
- The Fund may have exposure to currencies other than the Base Currency of up to 100% of its Net Asset Value.

Management process

- The Fund is actively managed.
- The Fund's investment exposures and returns may differ significantly from the benchmark.
- Our investment team use their discretion to identify a diverse mix of investments which they believe are most appropriate for the Investment Objective. As a result of this diversification, and during extreme equity market falls, losses are expected to be below those of conventional global equity markets, with a volatility (a measure of the size of changes in the value of an investment) typically less than two thirds of equities.
- abrdn integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Multi-Asset ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See the relevant UCITS Key Investor Information Document (KIID) or PRIIP Key Information Document for details.

Key risks

- (a) The value of investments and the income from them can fall and investors may get back less than the amount invested.
- (b) The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- (c) The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- (d) The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- (e) Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- (f) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- (g) The fund invests in mortgage and asset-backed securities (which may include collateralised loan, debt or mortgage obligations (respectively CLOs, CDOs or CMOs)). These are subject to prepayment and extension risk and additional liquidity and default risk compared to other credit securities.
- (h) The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

- (i) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- (j) The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.

Derivative usage

- The Fund may use investment techniques (including Derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they 'derive' their price from another asset. They can generate returns when share prices and/or indices fall.

A summary of investor rights can be found in English on our website - www.abrdn.com/corporate/legal. To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents, Product Highlights Sheet available in the local language, and Prospectus available in English, which are available on our website www.abrdn.com/singapore/investor. The Prospectus also contains a glossary of key terms used in this document. The Fund Management company may terminate arrangements for marketing the fund under the Cross-border Distribution Directive denotification process.

This Fund concerns the acquisition of units or shares in a fund, and not in a given underlying asset such as a building or shares of a company.

¹The Historic Yield as at 31/03/2023 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.20% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

Note: For income distributing share classes, please note that the Board of Directors of Aberdeen Standard SICAV I have the discretion to determine the frequency of dividend payments and dividend rate. Dividend payments and dividend rate are not guaranteed. Dividends may be paid out of investment income, capital gains or capital at the discretion of the Board of Directors. Past dividends are not a guide to future dividends and do not represent the returns of the fund. Any dividend paid and distributed out of the fund will result in an immediate reduction of the fund's Net Asset Value (NAV) per share. Dividend payments are made in the currency in which the relevant share class is denominated. Please refer to www.abrdn.com/en/singapore/investor/fund-centre#literature for the Dividend Report for more disclosures on the income statistics of the fund. Important information: The fund is a sub-fund of Aberdeen Standard SICAV I, a Luxembourg-registered open-ended investment company with variable capital (organized as a société d'investissement à capital variable or SICAV) with UCITS status. Aberdeen Standard SICAV I, being the responsible person of the fund, has appointed abrdn Asia Limited ('abrdn Asia') as its Singapore representative.
